

Project Basic Vibe

Artist Web3 Buy Button

2020 / 08 / 06

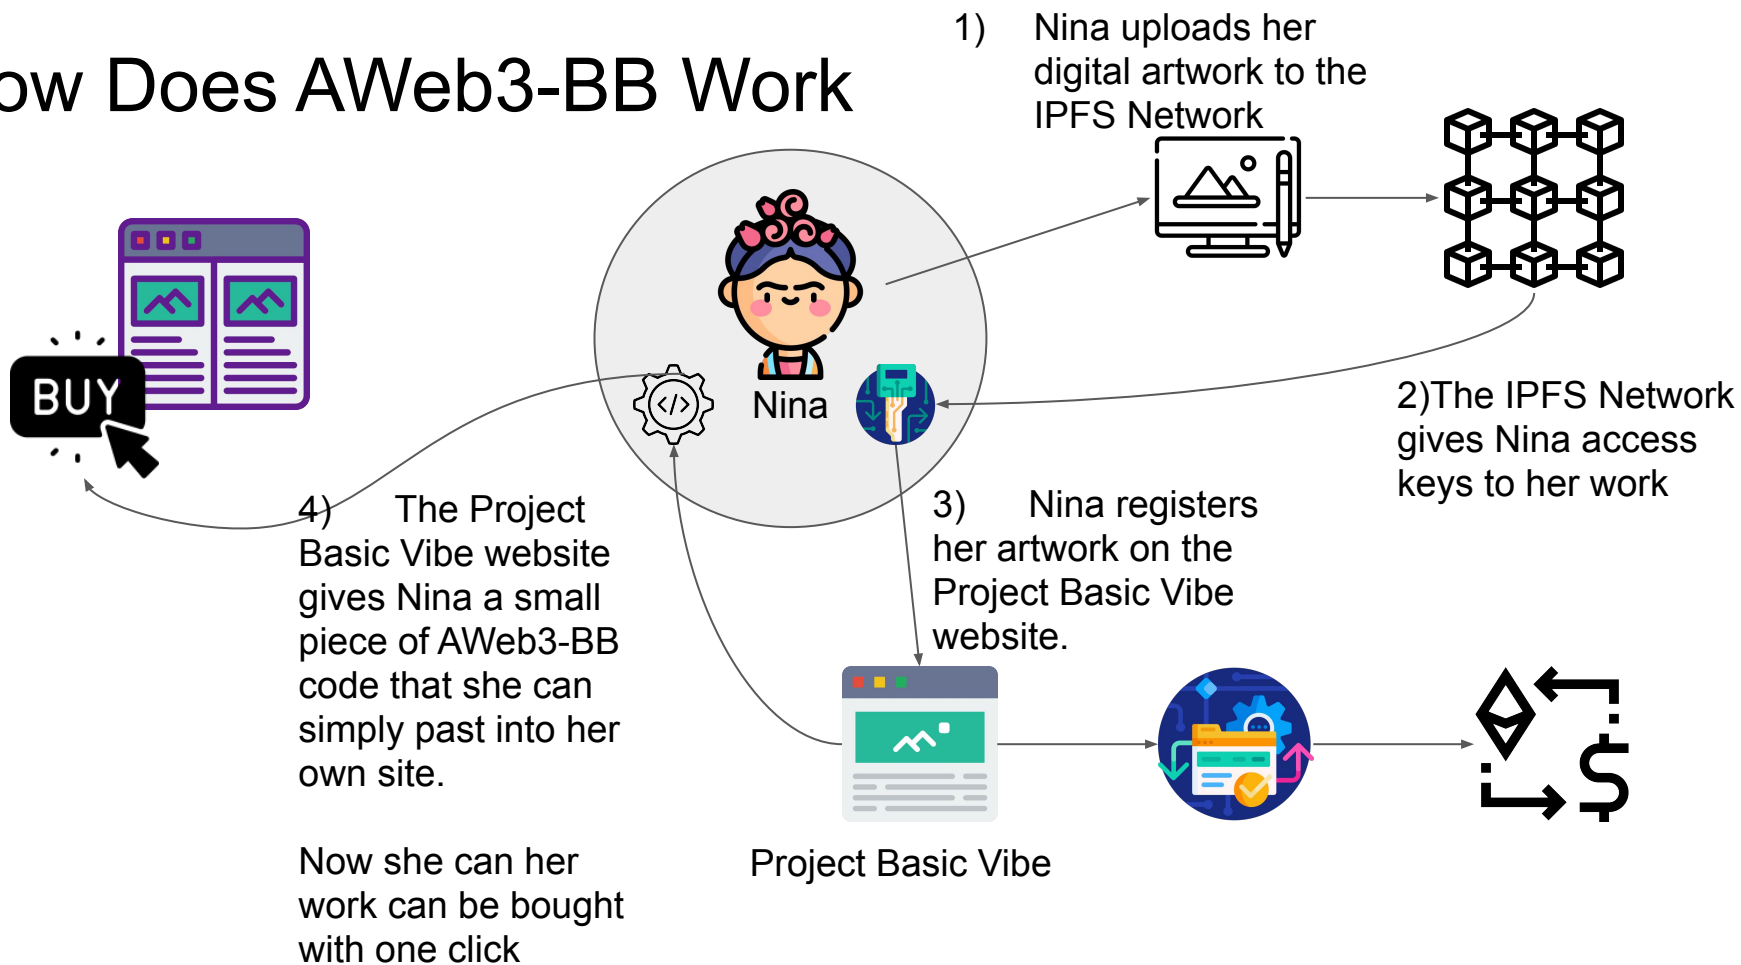

Why Project Basic Vibe

Project Basic Vibe is an endeavour to simplify access to the decentralized web by providing easy to use tools and integrations.

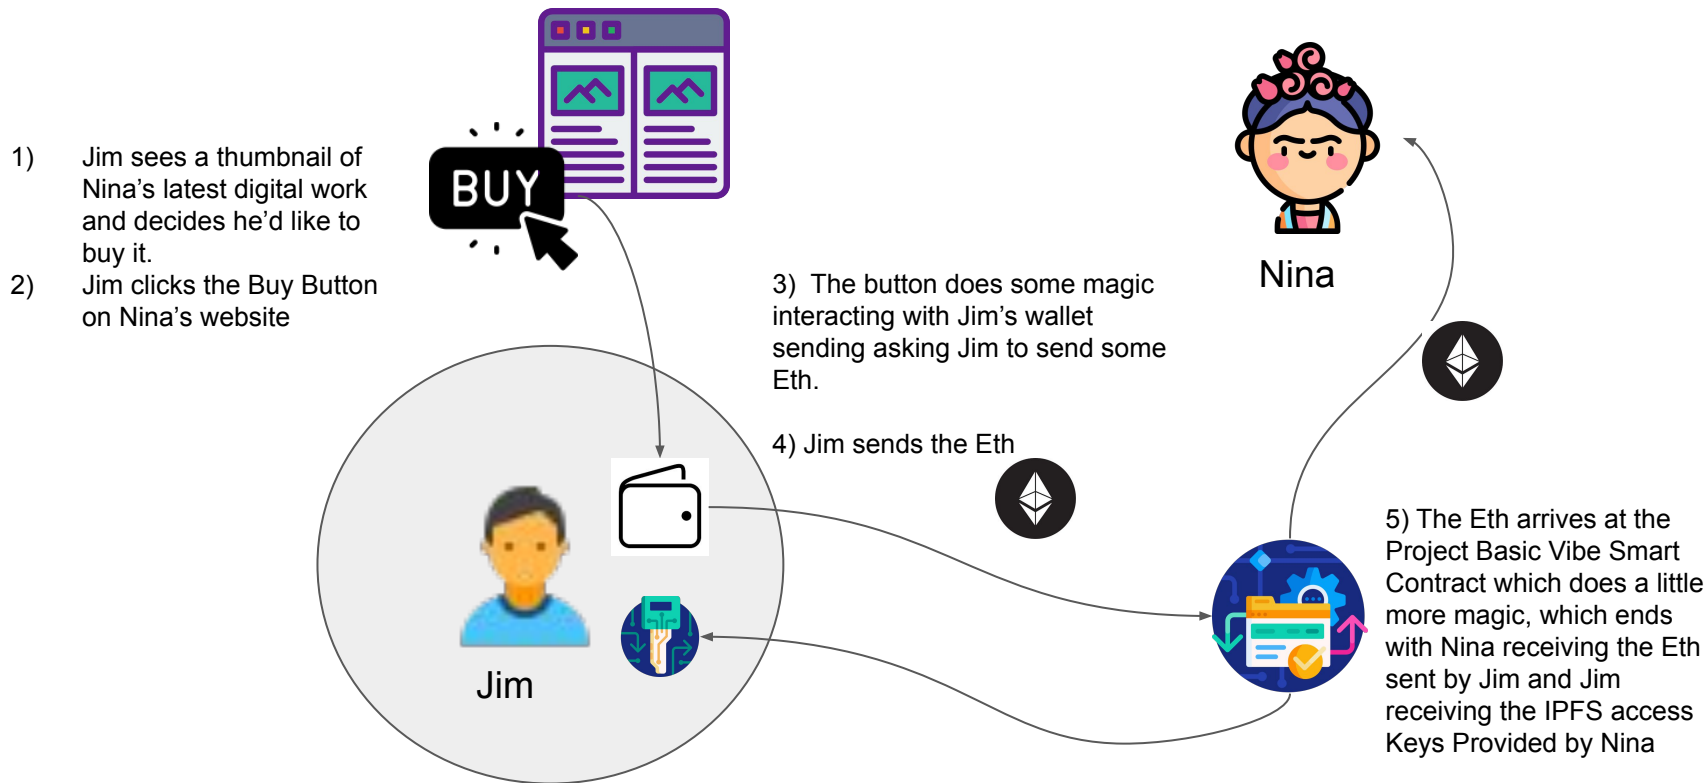

The Artist Web3 Buy Button or AWeb3-BB is targeted at making it easy for digital artists to sell their digital assets utilising a simple Web3 buy button that can be copied and pasted on any Web, dApp or mobile app.

With this simple access the innovators and trailblazers of society can beat a smooth and quick path to broad Web3 adoption.

How Does AWeb3-BB Work

How AWeb3-BB Helps Nina and Jim

The Technology

The following technologies have made Project Basic Vibe - AWeb3-BB possible:

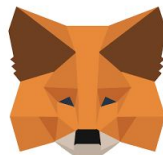

Unstoppable Domains - provide dApp web routing services and IPFS hosting

Pinata - provide access to the IPFS network for dApp hosting

Ethereum - provide smart contracts and cryptocurrency support using native Ether

Metamask - provide Web3 injection for decentralized access

IPFS - provide digital asset storage and core dApp hosting
